Introduction

This manual provides readers with instructions on how to properly apply the brand design to all internal and external communications.

These guidelines should help with keeping a unified design when working with different email templates. They also aim to prevent designers from unnecessary preparatory work and time-consuming decisions regarding small details, however, provide creative freedom within a recognizable framework. The objective is to show creativity as well as sensitivity in making use of these basic definitions, which have been kept lean on purpose.

The manual contains a description of all core elements of the StartupGrind

- Appearance
- Templates
- Modules

The **Appearance** section provides comprehensive information about the styles applied to email templates and modules: fonts, regular text and headings sizes, colors, padding, buttons, etc.

In the **Templates** section, you can find the screenshots and descriptions of exported email templates. You are able to preview them in browser as well as modify their design with the drag-n-drop editor.

The **Modules** section describes the existing set of all modules created in the same styles as email templates. You can combine any of modules to create the design of new email template according to your campaign preferences. The source code and all related images can be found in the Modules folder of the exported archive.

Enjoy!

Appearance

It is important that you read and understand these guidelines on how to use the most important elements of the StartupGrind visual identity.

For your convenience, the style description is divided into different areas of email templates.

The **General Settings** describe the common styles applied to the Content part of templates. In the **Header** and **Footer Settings** sections, you may see the corresponding styles for top and bottom parts of templates. Thanks to **Mobile View Settings**, you can alter responsive styles to adjust the appearance of particular email template to mobile devices.

Templates section

Design is the core element of brand identity and includes the overall «appearance» or visual presentation of StartupGrind.

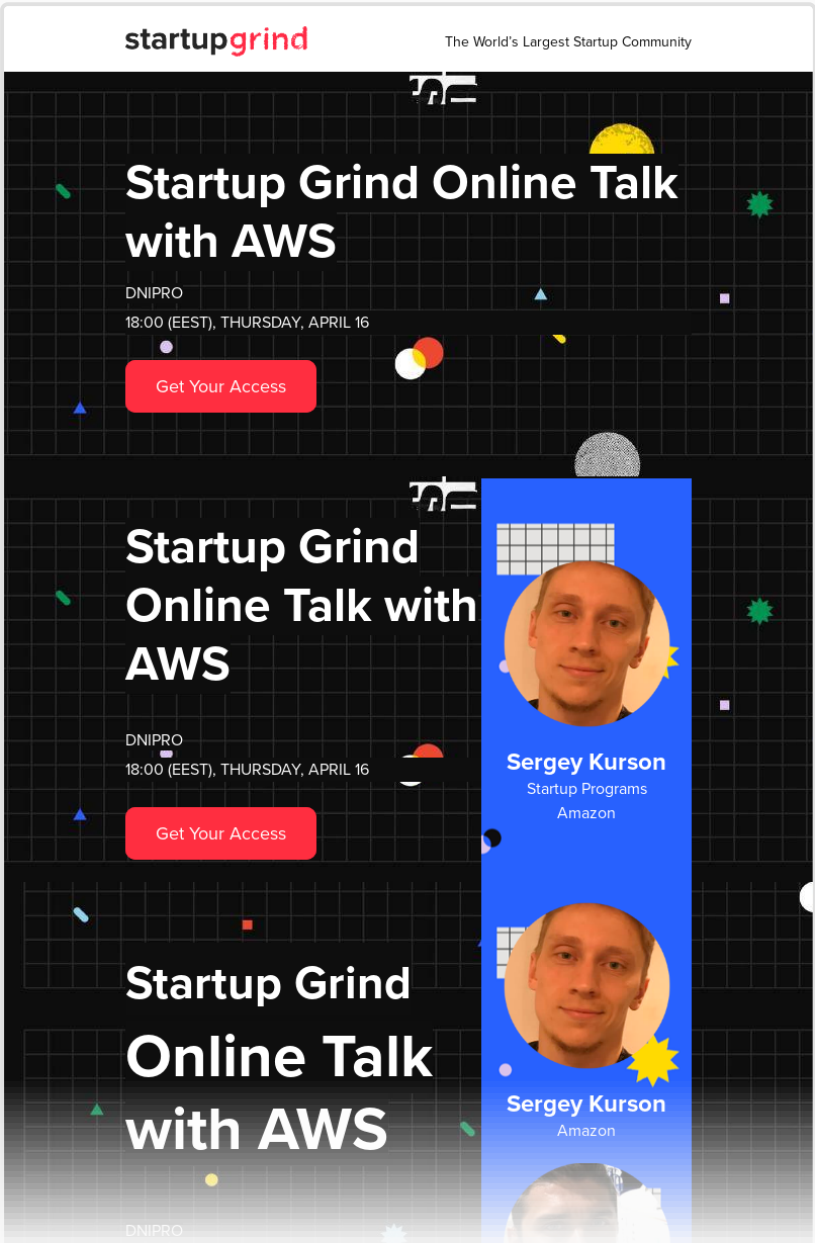

This includes email templates layout and used modules (e. g., headers, footers, call-to-actions, e-commerce, etc.) as well as the design of all other media channels that build the brand's identity.

In this section, you may find the examples of «ready-to-go» email templates. Each of them can be easily modified with a convenient drag-n-drop online editor and saved for further use.

Modules section

Unified principles are applied to all the processes of crafting every email module in accordance with brand design requirements to build brand awareness by means of every interaction with customers and target audiences.

It is, therefore, critical to consistently observe and apply the design standards to ensure high-quality branding.

The modules, presented in this section, are grouped into the following categories, according to the areas of email templates:

- [Headers](#)
- [Banners](#)
- [Info Module](#)
- [Product Cards](#)
- [Footers](#)
- [Other](#)

To check HTML code of every module below, please, open the interactive document called [Modules.html](#).
